EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lawrence J. Merkel on 16 November 2004.

The application has been amended as follows: line 1 of claim 13 has been changed from "A method comprising:" to "A computer-implemented method comprising:"

2. The following is an examiner's statement of reasons for allowance: The arguments presented in the Appeal Brief filed 10/21/04 have been found to be persuasive. The Applicant's assertions that the antecedence of the phrase "said result" requires a single instruction produce the result for each of the situations (zero extending or preserving) is correct. In light of these arguments the prior art of record has been found to not specifically teach or suggest, individually or in combination, the apparatus and method of claims 1, 13, 20, 26, 32, and 35 for executing an instruction where a register has a first number of bits; when an operand size is a second number of bits of the instruction is fewer than the first number zero, extending the instruction result and placing it in the register; and when the operand size is a third number of bits less than the first number and not equal to the second number, placing the result in the register and preserving the non-updated bits; as well as all the other limitations of the claims.

The dependent claims 2, 8-11, 14, 17, 18, 21-25, 27-31, 33, 34, 36, and 37 are all allowable as being dependent on the allowable independent claims

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
